Education

J.D., Harvard Law School,
1991

B.A., Franklin & Marshall
College, 1984

Larry Joseph formed his firm in July 2003 to undertake several *pro bono* matters that he could not undertake *pro bono* with his prior firm. Since 1991, he has represented the medical, chemical, petroleum, railroad, automotive, manufacturing, and construction industries, with an emphasis on:

- Administrative Procedure Act challenges to agency rules;
- Clean Air Act and associated state and regional laws;
- Federal Food Drug & Cosmetic Act and Food Quality Protection Act;
- Toxic Substances Control Act; and
- Federal Insecticide, Fungicide, and Rodenticide Act.

He has represented domestic and international corporations in a variety of industries, as well as individuals, governments, and trade associations in most environmental contexts, including:

- Appellate and district-court challenges to agency rulemakings;
- Agency and citizen enforcement of NSR/PSD, NSPS, NESHAP, NPDES, POTW, TSCA, FIFRA, OSHA, and SARA Title III regulations;
- Preparation of facility banking/permitting applications under NSR/PSD, Title V, and solid waste regulations;
- Transportation and facility project siting and approval under NEPA, related federal/state laws, and transportation/general conformity;
- Approval of air quality implementation plans and redesignation of Clean Air Act nonattainment areas; and
- Data Quality Act and Federal Advisory Committee Act challenges to agency information.

Before forming his firm, Mr. Joseph practiced with McKenna Long & Aldridge, LLP in Washington, DC, and Pillsbury Madison & Sutro, L.L.P., and Morrison & Foerster, L.L.P in San Francisco.
